Editing Species Lists - Getting There Option 1

- From View Mode to Edit Mode

The screenshot shows the Natural Resource Information Portal interface. On the left sidebar, the 'Search' button under the 'NP Species' section is circled in red. In the main content area, the 'Species Search' results for 'Abraham Lincoln Birthplace National Historical Park (ABLI)' are displayed. The 'Edit Species List' link is circled in red.

Category	Order	Family	Code	Scientific Name	Common Name	Park Accepted St...	Park Ac
Mammal	Artiodactyla	Cervidae	180699	<i>Odocoileus virgi...</i>	white-tailed deer	Accepted	Od
Mammal	Carnivora	Canidae	180599	<i>Canis latrans</i>	coyote	Accepted	Ca
Mammal	Carnivora	Canidae	180609	<i>Urocyon cinereo...</i>	common gray fox	Accepted	Urc
Mammal	Carnivora	Canidae	180604	<i>Vulpes vulpes</i>	red fox	Accepted	Vu
Mammal	Carnivora	Felidae	180582	<i>Lynx rufus</i>	bobcat	Accepted	Lyr
Mammal	Carnivora	Mephitidae	180562	<i>Mephitis mephitis</i>	striped skunk	Accepted	Me

Editing Park- Species Profiles – Getting There Option 1

- From View Mode to Edit Mode

The screenshot illustrates the workflow for editing a species profile in the NR Info Portal. It is divided into three main sections:

- Search Results:** Shows a table of search results. The entry for *Odocoileus virginianus* (white-tailed deer) is highlighted with a red circle. A red arrow points from this entry to the 'Edit Profile' button in the next section.
- Search Definition:** Shows the search criteria used to find the species. The 'Search Type' is set to 'Park-Species Profile', and the 'Select Unit' is 'North Cascades National Park (NOCA)'. Both are circled in red.
- Species Profile View:** Shows the 'Park Species Profile' for *Oreamnos americanus*. The 'Edit Profile' button is circled in red. Below the profile definition, there are tabs for 'Summary', 'Taxonomy', 'Park Classification', 'Park Status', 'Units', 'Record Information', and 'Evidence'. The 'Unique Park-Species Profile Identifiers' section is expanded, showing fields for Unit, Migration Date, Scientific Name, Certified Date, and Workbench.

Category	Order	Family	Code	Scientific Name	Common Name	Park Accepted St.	Park Ac
Mammal	Artiodactyla	Cervidae	180055	<i>Odocoileus virginianus</i>	white-tailed deer	Accepted	De
Mammal	Carnivora	Canidae	180599	<i>Canis latrans</i>	coyote	Accepted	Ce
Mammal	Carnivora	Canidae	180009	<i>Urocyon cinereo-l.</i>	common gray fox	Accepted	Urc
Mammal	Carnivora	Canidae	180804	<i>Vulpes vulpes</i>	red fox	Accepted	Vul
Mammal	Carnivora	Felidae	180582	<i>Lynx rufus</i>	bobcat	Accepted	Lyn
Mammal	Carnivora	Mephitidae	180562	<i>Mephitis mephitis</i>	striped skunk	Accepted	Mf

Editing Park- Species Profiles – Getting There Option 2

- From Editing a Species List

The screenshot shows two overlapping views of the Natural Resource Information Portal. The left view is the 'Species List Edit' page, and the right view is the 'Edit Profile Page'. A red arrow points from the 'Oreamnos americanus' entry in the species list to the 'Edit Profile Page'.

Species List Edit Page:

- Navigation: Home, References, **Biology**, Geospatial, Air & Climate, Geology & Soils, Water, Landscapes, Human Use
- Species Lists x Edit
- Select Layout: Park Status View
- Search Results Table:

Category	Code	Scientific Name	Common Name	Occurrence	Abundance
Mammal	1807	Oreamnos americanus	mountain goat, Rocky Moun...	Present in Park	Uncommon
Mammal	180711	Ovis montanus	bighorn sheep		Unknown
Mammal	180703	Alces alces	mosse	Present in Park	Rare
Mammal	180695	Cervus elaphus	elk	Probably Present	Rare
Mammal	180698	Odocoileus hemionus	black-tailed deer	Unconfirmed	Rare
Mammal	180699	Odocoileus virginianus	white-tailed deer	Historic	Common
Mammal	180599	Canis latrans	Coyote	Encroaching	NA
Mammal	180596	Canis lupus	gray wolf, Wolf	False Report	Rare
Mammal	180604	Vulpes vulpes	Red Fox	NA	Occasional
Mammal	180587	Felis concolor	mountain lion	Present in Park	Unknown
Mammal	180585	Lynx canadensis	Canada lynx, Canadian Lyn...	Probably Present	NA

NPSpecies Disclaimer & Liability Statement

NPSpecies provides information on the presence and status of species in our national parks. Although the data have been reviewed using the best information available at the time of disclosure, these species lists are not exhaustive (e.g., the absence of a species from a list does not necessarily mean the species is absent from a park). Varying degrees of effort spent surveying species or mining historical reference information may have resulted in data gaps. Also, please be aware that taxonomy for species changes over time and information may be listed under a different species name.

The National Park Service shall not be held liable for improper or incorrect use of the data described or contained herein. These data are not legal documents and are not intended to be used as such. The information contained in NPSpecies is dynamic and may change over time. It is the responsibility of the data user to use the data appropriately and in a manner consistent with data's limitations.

The National Park Service gives no warranty, expressed or implied, as to the accuracy, reliability, or completeness of the information in NPSpecies. It is strongly recommended that these data be acquired directly from an NPS server or source and not indirectly through non- National Park Service sources.

Grouping	Order	Family	Scientific Name	Common Name	Occurrence	Abundance	Residency	Nativity	Cultivation
Mammal	Artiodactyla	Antilocapridae	Antilocapra americana	Pronghorn Antelope	Present in Park	-	Vagrant	Native	NA
Mammal	Artiodactyla	Bovidae	Bos bison	American bison	Historic	-	NA	Native	NA
Mammal	Artiodactyla	Bovidae	Bos taurus	domesticated cattle	Present in Park	-		Non-Native	Cultivated
Mammal	Artiodactyla	Bovidae	Oreamnos americanus	Mountain Goat	Encroaching	-	Vagrant	Non-native	Not cultivated

Page 1 of 1 Displaying 1-69 of 69

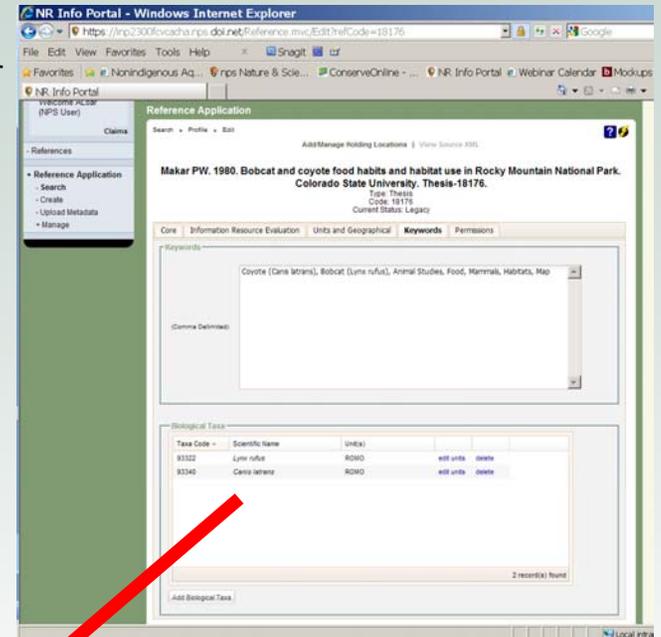

1) Layout to be used is Park Status View
 2) Public version will not repeat the search parameters above the Search results
 3) Disclaimer will be different from internal version
 4) The grid will be simplified with less fields displayed
 5) No hyperlink to PS Profile on sci names
 6) Unformatted Scientific Name used
 7) Notification, Header, and MultiColumn Sorter tool collapsed be default

Use Public Release table to determine what fields to display values for, Dash "-" used when values not ready for release when ALL categories are selected. If only one category is selected, then the column is not visible.

Linking References

- In Reference keywords section
 - Add Biological Taxa w/ Unit
- In NPSpecies PS Profile
 - Evidence Tab link Reference

Evidence Type: **References**
 Vouchers
 Observations

▲ Get help linking Documents and Data Sets

Documents and Data Sets that are linked to NPSpecies have a checkmark in the Linked to Profile box. Those that are not yet linked do not have their Linked to Profile checkmarked. To link a document or data set to NPSpecies the document or data set must already be entered into Reference Application. Documents and Data Sets must have this species linked to this unit. To link to a document or data set, check the Linked to Profile box. To remove a link to a reference uncheck the Linked to Profile checkbox. This does not delete the reference. To Add a New Reference, click on the Add a New Reference button. Changes to this table will not take affect until this Park-Species Profile edits have been submitted.

Linked to Profile	Code	Type	Display Citation	File Count

Add New Reference

Once Biological Taxa entered in Reference, then you can link them in NPSpecies.

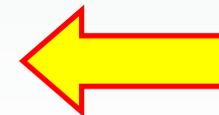

Adding New Taxon

- Add New Species button
 - Searches for something in Taxonomy
 - If species cannot be found, wizard guides you through create taxon process
 - Results creates a new record in taxonomy
 - This new record can be used in NPSpecies, Observations, Vouchers, and/or Reference

Add New Species button

Adds new row in Species List
