

## CAFÉ SELECTIONS

- What are our **invasive plant priorities** and why are they that way? *Tables 1 & 2*
- In what ways can **ranchers and public land stewards work together** to benefit one another and the lands they cherish? *Tables 3 & 4*
- How are you **incorporating climate change** impacts into your work? *Table 5*
- How can we increase sharing of resources between land managers and interested citizens to collaborate in **monitoring Black Hills stream conditions**? *Table 6*
- How do you incorporate **native pollinators** into land management planning? *Table 7, sessions 1 & 2 only*
- What could you and/or your institution do to provide **teaching, networking, and collaboration** opportunities among area “ecologists and botanists”? *Table 7, session 3 only*
- How should we shape the process of determining plant **coefficients of conservatism** in this region to best fit the way they will be used? *Table 8, session 1 only*
- What elements do successful **restoration or rehabilitation projects** share? *Table 8, sessions 2 & 3 only*
